SUMMARY

Ambitious and results-driven Bachelor of Information Technology student with a strong interest in cybersecurity, artificial intelligence, data science, and automation. Skilled in programming, database systems, and problem-solving, with hands-on experience in academic and personal projects. Passionate about leveraging technology to solve real-world problems and continuously advancing technical expertise in fast-evolving environments.

EDUCATION

DC Marivate Secondary-2022

- **National Senior Certificate: Bachelors Pass**

Sefako Makgatho University-2023-2024

- **Bachelor of Science in Physical Sciences**

Belgium Campus ITiversity: 2025-Present

- **Bachelor of Information Technology**

WeThinkCode: March 2026-June 2026

- **Data Engineering**

TECHNICAL SKILLS

Programming Languages: Python, SQL, C#, JavaScript, HTML, CSS

Cybersecurity: Security fundamentals, security automation, incident response, network security, ethical hacking, malware analysis, cloud security, risk management

Data & AI: Data analysis, machine learning, deep learning, logistic regression, prompt engineering, generative AI

Tools & technologies: NumPY, Nmap, SIEM, TensorFlow, WireShark, Pandas, Metasploit, Scikit-learn, Excel Solver

Soft skills: Problem solving, analytical thinking, teamwork, leadership, work ethic and responsibility, project management, time management, attention to detail

Other skills: Graphic design, social media management, presentation

EXPERIENCE

Cybersecurity Intern(Application Security)

MWR Cybersecurity Consultation

[March 2026-July 2026]

- Assisted in identifying and analyzing application security vulnerabilities
- Supported security testing and basic penetration testing activities
- Gained hands-on experience in secure coding practices and risk assessment
- Contributed to improving application security awareness and best practice

Social Media Manager & Delivery Coordinator

Heaven HomesteadHub Store

[Feb 2024-March 2026]

- Managed and grew social media platforms to promote homeware products (pots, cutlery, and household items)
- Created engaging content to increase brand visibility and customer engagement
- Coordinated customer orders and handled delivery logistics efficiently
- Maintained strong customer relationships through communication and service

PROJECTS

AI Threat Detection Tool (Machine Learning / Cybersecurity)

- Developed a Python-based system to monitor network traffic and detect suspicious patterns in real time
- Applied advanced detection techniques to reduce false positives in identifying unauthorized access attempts
- Strengthened understanding of intrusion detection systems and security analytics

SecureChain Access Monitor (Blockchain / Cybersecurity)

- Designed a decentralized access control system using Ethereum smart contracts
- Integrated blockchain transparency tools for auditing and tracking permission changes within a network
- Demonstrated knowledge of secure, tamper-proof access management systems

KFX Trading Bot (Automation / FinTech)

- Engineered a Python-based trading bot to automate strategies based on Smart Money concepts
- Implemented robust risk management protocols to protect capital during high market volatility

INTERESTS

Hackathons: Completing in capture-the-flag (CTF) events and AI builds

Innovations: Exploring the intersection of AI and Ethical Hacking

Community: Developing educational content for Cyber Awareness Platform

CERTIFICATION

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate -Oct 2025

Malware Analysis on AWS: Setting up a Secure Environment on-Sept 2025

Automating Cloud Security Posture Management on AWS-Sept 2025

MasterCard- Cybersecurity Job Simulation-Jul 2025

Google Automate tasks with Gemini and App Script- March 2026

More certification available on LinkedIn
