

Kitso Knowledge Matlaila

Pretoria, Gauteng | 068 523 5940 | <https://github.com/kitsomatlaila> | kitsomatlaila14@gmail.com |

SUMMARY

Ambitious Information Technology student with a strong interest in cybersecurity, cloud security, and automation. Experienced in Python scripting, cloud-native systems, and security-aware application development through academic and personal projects. Familiar with Linux environments, networking fundamentals, web technologies, and basic threat detection concepts. Seeking a cybersecurity internship to gain hands-on experience, contribute to real-world security operations, and grow as a security professional.

EDUCATION

Belgium Campus ITversity — 2025–Present

Bachelor of Information Technology

Sefako Makgatho University — 2023–2024

Bachelor of Science in Physical Sciences

DC Marivate Secondary School — 2022

National Senior Certificate (Bachelor’s Pass)

SKILLS

Soft & Technical Skills • Problem-solving • Logical thinking • Debugging & troubleshooting • Documentation • Team collaboration & learning mindset	Cybersecurity & Systems • Ethical hacking fundamentals • Threat detection & analysis concepts • Secure coding principles • Linux / Unix fundamentals • Basic networking concepts (TCP/IP, DNS, HTTP/HTTPS) • Operating system fundamentals (Windows & Linux) • Cloud security fundamentals (AWS)	Programming & Development • Python • SQL • HTML & CSS • C# • JavaScript • Powershell
---	---	---

PROJECTS

AI Threat Detection Tool (ML/Security) * Developed a Python-based system to monitor network traffic for suspicious patterns.

- Applied Detection Thinking to reduce false positives in identifying unauthorized access attempts.

SecureChain Access Monitor (Blockchain/Security) * Designed a decentralized access control system using Ethereum smart contracts.

- Integrated Etherscan for transparent auditing of permission changes within a network.

KFX Trading Bot (Automation/FinTech) * Engineered a bot using Python to automate trading strategies based on "smart money" concepts.

- Implemented strict risk management protocols to protect capital during high volatility.

CERTIFICATIONS & CONTINUOUS LEARNING

- Cloud Security: Securing Generative AI (AWS)
- Automating Cloud Security Posture (AWS)
- PwC Cybersecurity Consulting Simulation (Forage)
- Deloitte Cyber Job Simulation (Forage)
- Specialized Malware Analysis on AWS
- Oracle Certified Foundations Associate – AI
- SPLUNK: Cybersecurity Landscape
- iOS Development for Beginners – Swift & App Building (GeeksforGeeks)

INTERESTS

Hackathons: Competing in capture-the-flag (CTF) events and AI builds.

Innovation: Exploring the intersection of AI and Ethical Hacking.

Community: Developing educational content for the Cyber Awareness Platform.
